

Case Study 2018

Chemist Warehouse

Retail Lighting Upgrade

Pharmaceutical Store

Chemist Warehouse is one of the largest low cost pharmaceutical providers in Australia ensuring customers with a lowest price guarantee. The Footscray store provides a large array of products and a friendly service with a smile.

Pharmacies are governed by strict lighting requirements. Due to degradation purposes, all exposure of medicines to ultraviolet light must be prevented, making LED lighting a perfect solution. Our LED's do not emit UV radiation and the lighting specialist was able to work with management to select a quality light, that also provided some great electricity savings.

CHEMIST WAREHOUSE
OPEN 7 DAYS

THEY SAVE
\$11,806
PER YEAR
