LED Lighting Upgrade for Healthcare Facility

Epworth HealthCare is Victoria's largest not-for-profit private hospital group, renowned for its excellence in diagnosis, treatment, care and rehabilitation. The Epworth Richmond facility is Australia's largest private hospital.

Project Goals

Epworth HealthCare was looking to cut operating and maintenance costs, update the look and feel of the hospital and maximise the government rebates available under the Victorian Energy Upgrades scheme.

Our Solution

We delivered the upgrade according to the specific lighting requirements for hospital environments under AS/NZS 1680.2.5:1997. Meticulous project planning and flexibility were crucial to avoid any operational impact on the hospital. As a result of our ongoing communication with the onsite engineering team and implementation of infection control measures, the upgrade was delivered safely and efficiently.

About The Green Guys Group

As Australia's Leading Energy Saving Partner, we specialise in LED lighting, heat pump water heater, and air conditioning system upgrades, while our Green Guys Solar division offers cutting-edge solar solutions. Our approach includes securing government subsidies to maximise our clients' return on investment. Our comprehensive project management is anchored in ISO certifications in quality management, occupational health & safety, and environmental standards, ensuring quality and safety in every project.
