

Case Study 2018

# Western Distributors

## Commercial Lighting Upgrade

### ***Flooring Experts***

Western Distributors is one of Victoria's largest flooring companies and supplies some of the biggest names in construction and building, locally and throughout Victoria.

They wanted to update their aging fluorescent lights to a more efficient form of lighting, with minimum impact to the daily running of the business. The Green Guys Group were able to supply their high quality LED tubes and coordinate with management, to provide a hassle free and quick install. Resulting in huge energy use reductions and maintenance costs.

THEY SAVE  
**\$12,891**  
PER YEAR
